

Your Smooth Migration To The Cloud Starts With Our SAP on Azure Workshop

Migrating your entire SAP environment is a very complex and daunting task. Which is why we believe a workshop is needed to help us better understand your business so we can build a tailored and strategic implementation plan and business case.

Pre-workshop details

The cost

We do not charge for running the workshop or for providing you with our written migration proposal and recommendations.

Conditions

As the time of our SAP specialists is limited, we need to evaluate your workshop request to ensure that your goals are in line with the overall objectives of re-locating your SAP to Azure public cloud.

Though very unlikely, following on from the assessment, NTT Communications does retain the right to refuse access to these facilities for those requests that do not fall into our defined scope.

Workshop details

Location

The workshop can be held at either one of your offices or in the comfort of an NTTE office.

Who needs to attend

- The Global Service IT Manager
- A SAP specialist
- A key person for your SAP service

Gathering your details

- Current SAP Landscape (Sandbox, Development, Test, QA and Production).
- SAP Application requirements, sizing & scalability analysis including current interfaces & external access requirements.
- Current High Availability & Disaster Recovery strategies, SLAs, RPO/RTO.
- Future growth and requirements.

The Workshop Agenda

Day 1

NTT Managed Services overview (1 hour)

Best Practices for Running SAP on Microsoft Azure (1 Hour)

Microsoft Azure Overview and Microsoft Azure Certification for SAP.

Microsoft Azure Infrastructure as a Service - Azure Virtual Networking, Storage and Virtual Machines.

Best Practices for running SAP on Microsoft Azure and commonly used Deployment Scenarios.

Architecture Design: SAP on Microsoft Azure Systems Architecture (2 hours)

Discuss Business Continuity and Mission-critical processes.

Discuss Landscape Considerations, including Sizing and Growth Estimates for 2-Tier or 3-Tier.

Gather details of current Server, SAN and Network Platform.

Draft Reference Architecture.

Architecture Design: SAP on Microsoft Azure Migration Strategies (1 hour)

Provide an assessment for migrating specific parts of SAP Landscape to Microsoft Azure.

Migration methods and systems.

Migration pre-requisites.

Migration phases.

Architecture Design Session (ADS) Wrap-up (30 minutes)

Validation of proposed high-level architecture.

Discuss requirements for the migration project and identify the necessary resources required.

Review and confirm timeline, milestones and success criteria.

Final review of ADS expectations and objectives.

Day 2

A week after the first day of the workshop we will arrange to meet again to present and discuss our recommendations.

With the information gathered before and during the workshop, we will build you a custom solution proposal that defines the Azure baseline cost for the systems necessary to fulfil your requirements.

Our proposal will include:

Azure IaaS

- VM,
- Storage,
- Backup solution,
- Etc.

Migration Plan

- High level migration plan.
- RACI matrix of responsibilities during the migration.

Managed Services Proposal

- Azure management.
- OS, Database and SAP Basis management.
